

## Vaulting table

---

### **SPIETH - Made in Germany**

All over the world people nowadays do gymnastics on SPIETH apparatus made in Germany. The experts associate essential quality criteria with SPIETH gymnastic equipment:

- Power-saving thanks to movement-supporting construction made according to the principle of initial tension (ORIGINAL REUTHER)
- safety through selection and use of the best materials
- dynamics because all relevant parameters are matched with each other
- high quality thanks to the permanent supervision of the production process and materials

SPIETH feels responsible to develop equipment that is, in quality and functionality, far beyond the degree demanded by the FIG thus ensuring the highest possible safety of the athletes. Thanks to this intrinsic quality, which can be found in every piece of SPIETH equipment, the International Gymnastics Federation, the supreme authority in gymnastics, has used SPIETH equipment in many international competitions.

**Art. 221**
**Vaulting Table "Ergojet"**

FIG certified.

Support area with 2-fold GFK dish and integrated resilience system as well as a patented metal spring for additional elasticity. Optimal impact protection by means of special padding of the front apron. Stepless height adjustment from 110 to 140 cm by means of a folding crank. Including fixing material for floor anchoring and 2-parts protection pad for additional safety. The transport system (Art. 251) is not included.

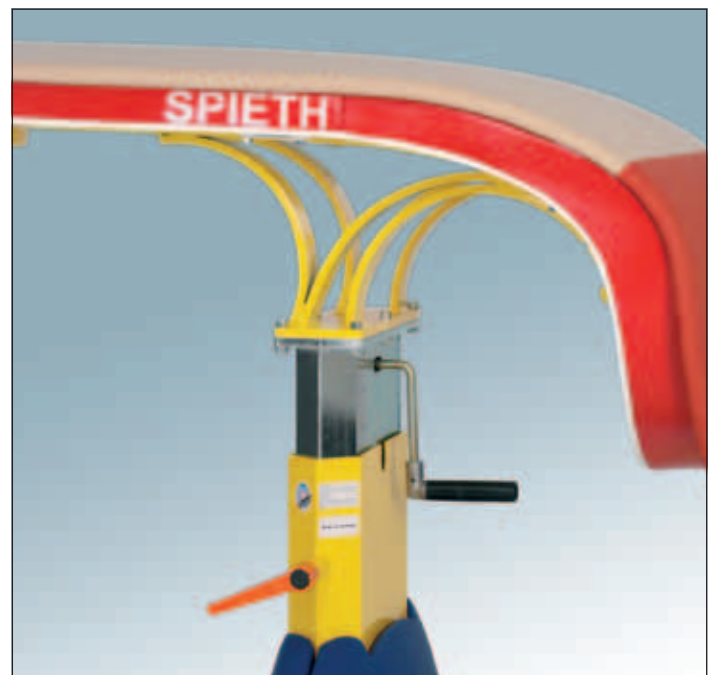

251

**Art. 251**
**Built-in Transport System**

For Art. 221.

Transport system with non-marking plastic rolls.

# Vaulting table

## Art. 250

### Vaulting Table "Ergojet Club"

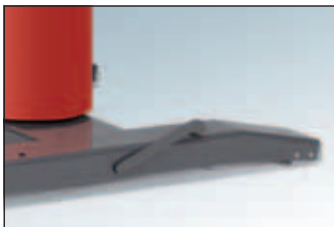

New model with a push-off area like at the competition vaulting table of approx. 95 x 120 cm. Easily height adjustable by means of a gas-loaded spring in steps of 5 cm from 90 to 135 cm.

The cover is made of hygroscopic synthetic leather and is fixed on the upper part of the vaulting table by means of Velcro thus being easily replaceable.

Including integrated transportation wheels and protective padding of pillars.

An ideal training apparatus for young gymnasts due to the low height adjustment up to 90 cm.

This vaulting table is especially suitable for schools and clubs!

## Art. 223

### Vaulting Table "Ergojet Junior"

"Mini-Vaulting Table" for children and youth with fastening material, height-adjustable in steps from 85 to 125 cm, resilient surface with special padding of the front part.

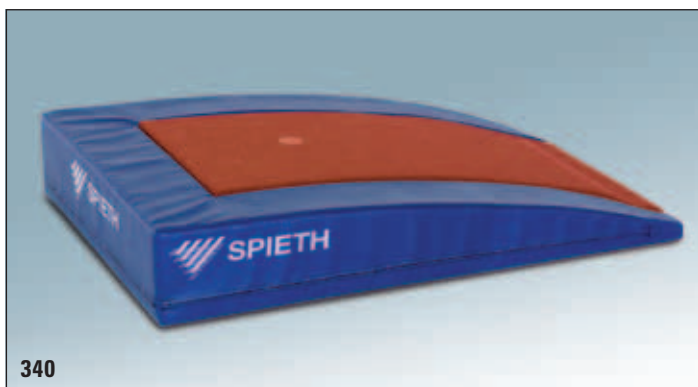

469

## Art. 469

### Fleece Covering for Vaulting Table „Ergojet“

Original fleece covering to put onto the body of the vaulting table. Fixation by means of integrated belt system. Can be applied for both to protect your new vaulting table timely against natural wear or to cover the already worn upper part.

**Art. 340**

**Rondat Mat, long**

Safety mat to protect from injuries when overstepping the spring board during round-off vaults. Surrounds the spring board completely on 3 sides. The front is 20 high according to the new FIG apparatus norms.

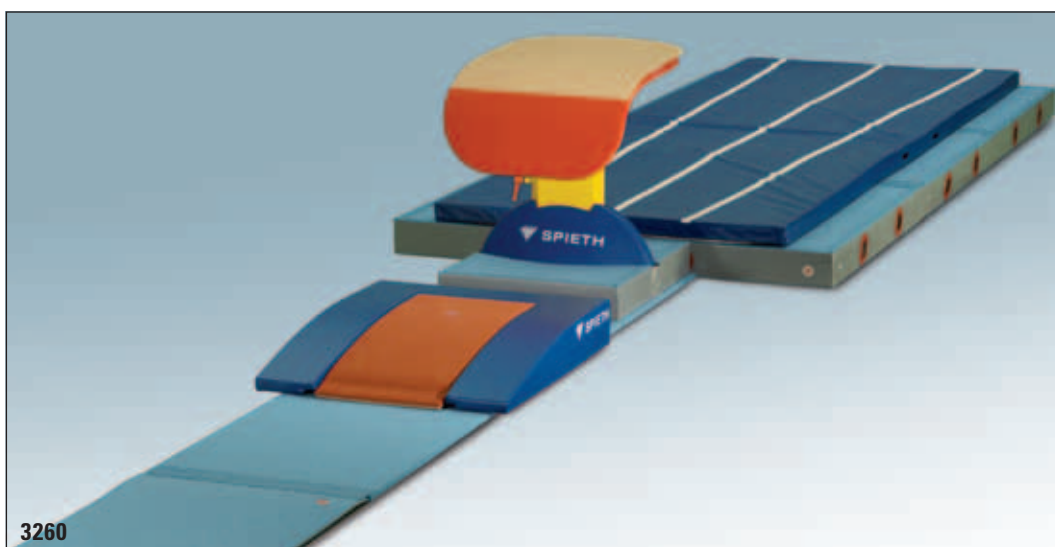

**230**

**Art. 230**

**Vaulting Table for Training**

Foam vaulting table consisting of 3 parts with PVC cover. The construction includes two hard foam modules each 50 cm high and one half-round foam module 25 cm high with a shape similar to the one of vaulting table. All the modules are fixed together by means of Velcro. Total size: 90 x 75 x 125 cm.

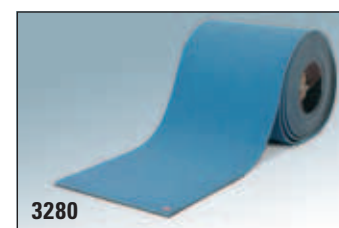

**3260**

**Art. 3260**

**Run-up and Jumping Device**

ORIGINAL REUTHER.

Consisting of 1 run-up track (width 100 cm, height 25 mm) made of special foam material with take-off plank for spring board and floor plate with through-hole for tension chain for the vaulting table, total length 25 m. Colour spiethblue.

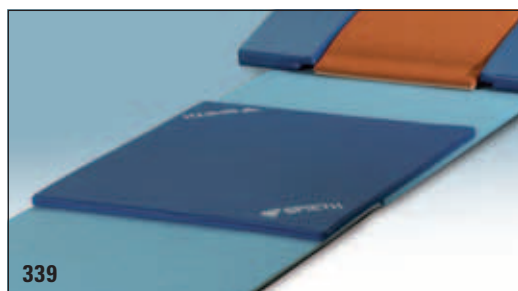

**3280**

**Art. 3280**

**Run-up Track**

Rollable "Triflex" mat, 25 mm thick, with high quality soft velour top. Length 25 m, width 1 m. Colour spiethblue.

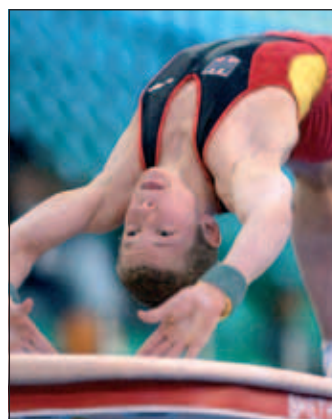

**339**

**Art. 339**

**Hand Safety Mat**

Placed on the run-up before the springboard provides special protection of wrists during the so-called rondat vaults.
